CAE Polymer Acoustic Enclosure

5.5 – 22 kVA Range

The innovative, compact design of the 5.5 – 22 kVA CAE enclosure range ensures optimum performance in the harshest of environments. The two-component polymer enclosure structure (hood and base), delivers superior durability with optimal access for ease of installation and maintenance servicing.

Extremely durable and robust, the highly corrosion and impact resistant enclosures are designed to withstand rough handling common on many construction sites.

Durable and Robust Construction

- Constructed from the compound polymer dicyclopentadiene (DCPD)
- Corrosion proof enclosure with unrivalled impact and heat resistance (–40°C to +120°C)
- Corrosion resistant modular air handling units
- Baseframe extends beyond enclosure protecting against handling damage
- Black finish stainless steel locks and hinges
- Zinc plated / stainless steel fasteners

Security and Safety

- Control panel viewing window in lockable enclosure hood
- Emergency stop push button mounted on enclosure exterior below control panel
- Cooling fan and battery charging alternator fully guarded
- Fuel fill and battery can only be reached via lockable access hood
- Exhaust silencing system totally enclosed for operator safety

Developed through continuing research and development by our specialist engineers, all FG Wilson enclosures are fully weatherproof and incorporate internally mounted exhaust silencers.

The sound attenuated CAE enclosures reduce sound levels to comply with the stage II levels of the European Community Directive 2000/14/EC, effective from 3 January 2006.

Excellent Service and Maintenance Access

- Lift up enclosure hood providing virtually a 360° view of the generator set
- Gas struts hold the hood of the enclosure in place during inspection or maintenance service
- Radiator fill via removable, flush mounted access cap fitted with compression seal
- Coolant drain piped to baseframe, exterior to the enclosure

Transportability

- Tested and certified single point lifting facility
- Drag points on baseframe facilitating handling from both sides
- Optional base feet to aid forklift handling

Note: Net Weight with lube oil, no coolant, no fuel;

FG Wilson manufactures product in the following locations:

Northern Ireland • Brazil • China • India • USA

With headquarters in Northern Ireland, FG Wilson operates through a Global Dealer Network.

To contact your local Sales Office please visit the FG Wilson website at www.FGWilson.com.

FG Wilson is a trading name of Caterpillar (NI) Limited.

In line with our policy of continuous product development, we reserve the right to change specification without notice.
